

ADVANCED MULTIPLE REGRESSION ANALYSIS

Tuesday/Thursday | 9:45 AM-11:00 AM | Zoom

Andrew Zieffler

Office: Zoom; Educational Sciences Building 178 (campus)

Office Hours: Wednesdays 9:00 AM-10:00 AM; and by appointment

Email: zief0002@umn.edu

Dogs: I have three; you will probably hear them at some point during class.

Course Description

This is an advanced graduate course that covers a diverse set of regression methodologies. We will begin with a brief review of the General Linear Model and establishment of a mathematical foundation for the estimation of regression coefficients and standard errors in these models through the use of matrix algebra. The course will also cover more advanced modeling techniques, such as regression diagnostics, WLS and sandwich estimation, PCA, shrinkage methods, model selection and local models.

<https://zief0002.github.io/epsy-8264/>

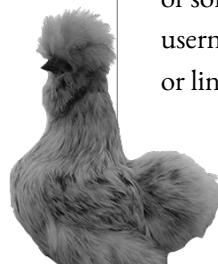

Communication

Email is the primary source of communication among instructors, teaching assistants, and students for this course. As such, you will be expected to check your email frequently (i.e., at least once per day). As per the University policy, "students are responsible for all information sent to them via their University assigned email account. If a student chooses to forward their University email account, he or she is responsible for all information, including attachments, sent to any other email account."

Stress Management

Stress management is an important piece of the skill set needed for success in graduate school. Pet Away Worry & Stress (PAWS) is one of the many resources available to students. Find out more at <http://www.bhs.umn.edu/services/wellness-paws.htm>.

Course Prerequisites

Prerequisites include a year-long Ph.D.-level statistics sequence in the social sciences or equivalent (in the Department of Educational Psychology this is EPsy 8251 and EPsy 8252), The use of statistical computing software for modeling and analysis is also required. A good working knowledge of algebra is also required.

Textbooks

- Fox, J. (2013). *A mathematical primer for social statistics*. Thousand Oaks, CA: Sage.
- Gromlund, G., & Wickham, H. (2017). *R for data science*. (online at <http://r4ds.had.co.nz/>)

Course Requirements

There are eight required homework assignments. The homework assignments and due dates will be posted on the course website. These assignments include problems that will help you learn the course material through reflection and practice. *Submit each assignment as a PDF file via email to the instructor.*

To foster cooperation and collaboration, you are permitted to form groups of no larger than three to work on the homework. Submit only one assignment per group, and list the names of each group member on the assignment. Each assignment will be scored and this score will be given to all individuals in the group.

Required Reading

As part of the course, there are several articles, papers and technical reports that you will need to read during the semester. Most of the articles themselves are accessible through the University of Minnesota library website (<http://www.lib.umn.edu>). In order to access the full text of some of the articles, you will need to log in using your University x500 username and password. More detailed information, including references or links to specific readings, will be made available to students on the course website.

Tilly the Therapy Chicken (@TherapyChicken)

Evaluation of Student Performance

Course grades will be based entirely on performance on the homework assignments. The points from the eight homework assignment will be pooled to compute the final course grade. Students who earn below 63% will receive the letter grade of F. If you are taking the course S/N, the minimum criterion to receive an S is 80% (the equivalent of a B- letter grade). Any student who does not complete all homework assignments without making prior arrangements with the instructor will receive a grade of F/N.

Cutoff	Grade	Cutoff	Grade	Cutoff	Grade
93%	A	83%	B	73%	C
90%	A-	80%	B-	70%	C-
87%	B+	77%	C+	63%	D

Discussion/Participation

While not a part of the course grade, active participation in the course is expected of all students enrolled in EPsy 8264. Active participation includes, but is not limited to, being engaged during the class, asking questions, providing additional insight and material, responding to other students and the instructor, and always being open and inquisitive.

Incomplete

An incomplete will be assigned only in extraordinary circumstances (e.g., hospitalization). An incomplete is an arranged grade which requires a written contract between instructor and student that includes by when and how the incomplete will be satisfied. Incomplete contract forms are available at z.umn.edu/incompletegradecontract or from program staff in 250 EdSciB.

Accessing Course Grades

Shortly after the course, you may access your grades online at <http://myu.umn.edu>. Assignments will be handed back in class or during office hours. Uncollected assignments will be retained for six weeks after the course ends and then discarded.

Technology

The course uses technology on a regular basis during both instruction and assessments (e.g., homework assignments, exams, etc.). Student difficulty with obtaining or operating the various software programs and technologies—including printer trouble—will not be acceptable as an excuse for late work. Due to the variation in computer types and systems, the instructor or TA may not be able to assist in troubleshooting all problems you may have.

Interacting with R

There are two ways to interact with and use R during the semester. You can install R and RStudio onto your local machine. (There are instructions for how to do this on the course website.) In this scenario, you are responsible for getting things to work on your computer. While it should be straightforward, each OS and computer has their quirks.

You can also access Studio via a University of Minnesota server at:

<https://rstudio-prd-ooi.cla.umn.edu/>

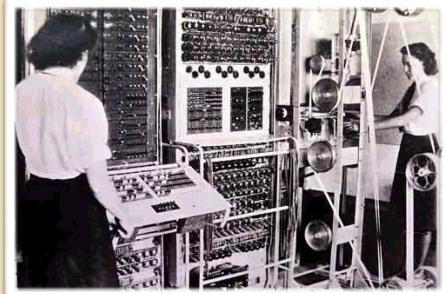

This requires an internet connection and you may not have access to this after the semester ends. Depending on how many students are logged into the server at one time, you also might experience some lag when you run more time-consuming computations.

Remote Learning and Office Hours

Our class is a remote learning version of EPsy 8264. Remote learning in this class means a blend of (1) in-person and synchronous work where the class meets online twice a week (via Zoom; T/R 9:45–11:00) as a whole and (2) asynchronous learning (reading, independent learning, and assignments). The Zoom link is:

<https://umn.zoom.us/my/zieffler>

Instructor office hours (both scheduled and unscheduled) will also be remote, via Zoom. If you schedule an office hour with Andy, it is best to send a Google Calendar invite so it gets on my calendar. You can also include a Zoom link with this invitation by selecting *Add Video Conferencing* within the calendar event.

STATISTICAL COMPUTING

Statistical computing is an integral part of statistical work, and subsequently, EPsy 8264. To support your learning in this area, this course will emphasize the use of R. R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS (<http://www.r-project.org>). It should be noted that while some R syntax and programming is taught during class time, there is also a fair amount that you may need to learn on your own outside of class. There are several tutorials and resources available on the web to help you learn R.

Course Outline

The outline below lists the tentative course topics. The dates listed are subject to change at the instructor's discretion. A more nuanced calendar, including links to readings, assignments, and course notes will be posted on the course website.

Welcome to EPsy 8264 (Sept. 08)

A brief orientation to the course, setting expectations, talking through the semester.

Matrix algebra and regression using matrices (Sept. 10-22)

This unit will also introduce some basic ideas and operations of linear/matrix algebra. It will also introduce how to use linear/matrix algebra to obtain regression estimates (e.g., coefficients, SEs) and give us tools for model representation and expression.

Matrix decomposition (Sept. 24-29)

This unit will introduce several matrix decomposition methods (LU, QR, SVD) that are useful for regression.

Regression diagnostics (Oct. 01-06)

This unit will introduce a series of tools to evaluate the distributional assumptions underlying the regression model and help diagnose problems (e.g., outliers, leverage, influence).

Tools for dealing with heteroskedasticity (Oct. 08-13)

This unit will introduce methods for dealing with heteroskedasticity, including variance stabilizing transformations, WLS estimation, and sandwich estimation.

Diagnosing collinearity and tools for dealing with it (Oct. 15-29)

This unit will introduce methods for diagnosing and dealing with collinearity, including variable reduction, biased estimation, and shrinkage.

Model selection (Nov. 03-17)

This unit will introduce common criteria for model selection (e.g., R₂, information criteria, Mallows Cp) and historical methods of automated model selection employed in education/psychology, including forward selection, backward elimination, stepwise, and best subsets. We will also build ideas of overfit. This unit will finally introduce cross-validation as a better method for model selection.

Local models (Nov. 17-Dec. 08)

This unit will introduce methods for fitting local models including piecewise regression and spline models.

Quantitative Methods in Education Mission Statement

QME strives to be a premier program recognized for leadership, innovation, and excellence, and to enable human potential through the advancement of education. QME prepares students to become cutting-edge professionals in educational measurement, evaluation, statistics, and statistics education, through excellence in teaching, research, and service; and through investigating and developing research methodology in education.

Department of Educational Psychology Mission Statement

Educational psychology involves the study of cognitive, emotional, and social learning processes that underlie education and human development across the lifespan. Research in educational psychology advances scientific knowledge of those processes and their application in diverse educational and community settings. The department provides training in the psychological foundations of education, research methods, and the practice and science of counseling psychology, school psychology, and special education. Faculty and students provide leadership and consultation to the state, the nation, and the international community in each area of educational psychology. The department's scholarship and teaching enhance professional practice in schools and universities, community mental health agencies, business and industrial organizations, early childhood programs, and government agencies. *Adopted by the Department of Educational Psychology faculty October 27, 2004*

College of Education + Human Development Mission Statement

The mission of the University of Minnesota College of Education and Human Development is to contribute to a just and sustainable future through engagement with the local and global communities to enhance human learning and development at all stages of the life span.

Goldy, c. 1965

University of Minnesota Policies and Procedures

Academic Freedom and Responsibility

Academic freedom is a cornerstone of the University. Within the scope and content of the course as defined by the instructor, it includes the freedom to discuss relevant matters in the classroom. Along with this freedom comes responsibility. Students are encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search for truth. Students are free to take reasoned exception to the views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.* Reports of concerns about academic freedom are taken seriously, and there are individuals and offices available for help. Contact the instructor (Andrew Zieffler; zief0002@umn.edu), the Department Chair (Kristen McMaster; mcmasoo4@umn.edu), your adviser, the associate dean of the college (Deborah Dillon; dillon@umn.edu), or the Vice Provost for Faculty and Academic Affairs in the Office of the Provost (Rebecca Ropers-Huilman; ropers@umn.edu).

*Language adapted from the American Association of University Professors "Joint Statement on Rights and Freedoms of Students".

Appropriate Student Use of Class Notes and Course Materials

Taking notes is a means of recording information but more importantly of personally absorbing and integrating the educational experience. However, broadly disseminating class notes beyond the classroom community or accepting compensation for taking and distributing classroom notes undermines instructor interests in their intellectual work product while not substantially furthering instructor and student interests in effective learning. Such actions violate shared norms and standards of the academic community. For additional information, please see: <http://policy.umn.edu/education/studentresp>.

Disability Accommodations

The University of Minnesota views disability as an important aspect of diversity, and is committed to providing equitable access to learning opportunities for all students. The Disability Resource Center (DRC) is the campus office that collaborates with students

who have disabilities to provide and/or arrange reasonable accommodations.

- If you have, or think you have, a disability in any area such as, mental health, attention, learning, chronic health, sensory, or physical, please contact the DRC office on your campus (612.626.1333) to arrange a confidential discussion regarding equitable access and reasonable accommodations.
- Students with short-term disabilities, such as a broken arm, can often work with instructors to minimize classroom barriers. In situations where additional assistance is needed, students should contact the DRC as noted above.
- If you are registered with the DRC and have a disability accommodation letter dated for this semester or this year, please contact your instructor early in the semester to review how the accommodations will be applied in the course.
- If you are registered with the DRC and have questions or concerns about your accommodations please contact your (access consultant/disability specialist).

Additional information is available on the DRC website: diversity.umn.edu/disability or e-mail drc@umn.edu with questions.

Equity, Diversity, Equal Opportunity, and Affirmative Action

The University will provide equal access to and opportunity in its programs and facilities, without regard to race, color, creed, religion, national origin, gender, age, marital status, disability, public assistance status, veteran status, sexual orientation, gender identity, or gender expression. For more information, please consult Board of Regents Policy: https://regents.umn.edu/sites/regents.umn.edu/files/2019-09/policy_equity_diversity_equal_opportunity_and_affirmative_action_n.pdf

Makeup Work for Legitimate Absences

Students will not be penalized for absence during the semester due to unavoidable or legitimate circumstances. Such circumstances include verified illness, participation in intercollegiate athletic events, subpoenas, jury duty, military service, bereavement, and religious observances. Such circumstances do not include voting in local,

state, or national elections. For complete information, please see:
<http://policy.umn.edu/education/makeupwork>.

Mental Health and Stress Management

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance and may reduce your ability to participate in daily activities. University of Minnesota services are available to assist you. You can learn more about the broad range of confidential mental health services available on campus via the Student Mental Health Website: <http://www.mentalhealth.umn.edu>.

Scholastic Dishonesty

You are expected to do your own academic work and cite sources as necessary. Failing to do so is scholastic dishonesty. Scholastic dishonesty means plagiarizing; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using test materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; altering, forging, or misusing a University academic record; or fabricating or falsifying data, research procedures, or data analysis. (Student Conduct Code: http://regents.umn.edu/sites/regents.umn.edu/files/policies/Student_Conduct_Code.pdf) If it is determined that a student has cheated, the student may be given an "F" or an "N" for the course, and may face additional sanctions from the University. For additional information, please see: <http://policy.umn.edu/education/instructorresp>.

The Office for Community Standards has compiled a useful list of Frequently Asked Questions pertaining to scholastic dishonesty: <https://communitystandards.umn.edu/avoid-violations/avoiding-scholastic-dishonesty>. If you have additional questions, please clarify with your instructor for the course. Your instructor can respond to your specific questions regarding what would constitute scholastic dishonesty in the context of a particular class—e.g., whether collaboration on assignments is permitted, requirements and methods for citing sources, if electronic aids are permitted or prohibited during an exam.

Senate Academic Workload Policy

One conventional credit is hereby defined as equivalent to three hours of learning effort per week, averaged over an appropriate time interval, necessary for an average student taking that course to achieve an average grade in that course. It is expected that the academic work required of graduate and professional students will exceed three hours per credit per week or 45 hours per semester.

Sexual assault, sexual harassment, stalking and relationship violence

In my role as a University employee, I am required to share information that I learn about possible sexual misconduct with the campus Title IX office that addresses these concerns. This allows a Title IX staff member to reach out to those who have experienced sexual misconduct to provide information about the personal support resources and options for investigation that they can choose to access. You are welcome to talk with me about concerns related to sexual misconduct. Within the requirements of my job, I will be as responsive to your requests for confidentiality and support as possible. You can also or alternately choose to talk with a confidential resource that will not share information that they learn about sexual misconduct. Confidential resources include The Aurora Center, Boynton Mental Health and Student Counseling Services.

The Department of Educational Psychology supports the efforts of the University of Minnesota towards prevention of sexual assault. We encourage all students to participate in the free online training that has been established for undergraduate students and graduate students. The training highlights pertinent issues regarding sexual assault, including, but not limited to: defining healthy relationships, consent, bystander intervention, and gender roles. The guide for the training in your My Training page is available at <https://it.umn.edu/training-guide-preventing-responding>. Additionally, to learn more about how you can help reduce sexual assault at the University of Minnesota, please visit the Aurora Center.

Sexual Harassment

"Sexual harassment" means unwelcome sexual advances, requests for sexual favors, and/or other verbal or physical conduct of a sexual nature. Such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creating an intimidating, hostile, or offensive working or academic environment in any University activity or program. Such behavior is not acceptable in the University setting. For additional information, please consult Board of Regents Policy: https://regents.umn.edu/sites/regents.umn.edu/files/policies/Sexual_Harassment_Sexual_Assault_Stalking_Relationship_Violence.pdf

Student Conduct Code

The University seeks an environment that promotes academic achievement and integrity, that is protective of free inquiry, and that serves the educational mission of the University. Similarly, the University seeks a community that is free from violence, threats, and intimidation; that is respectful of the rights, opportunities, and welfare of students, faculty, staff, and guests of the University; and that does not threaten the physical or mental health or safety of members of the University community.

As a student at the University you are expected adhere to Board of Regents Policy: Student Conduct Code. To review the Student Conduct Code, please see: http://regents.umn.edu/sites/default/files/policies/Student_Conduct_Code.pdf.

Note that the conduct code specifically addresses disruptive classroom conduct, which means "engaging in behavior that substantially or repeatedly interrupts either the instructor's ability to teach or student learning. The classroom extends to any setting where a student is engaged in work toward academic credit or satisfaction of program-based requirements or related activities."

Use of Personal Electronic Devices in the Classroom

Using personal electronic devices in the classroom setting can hinder instruction and learning, not only for the student using the device but also for other students in the class. To this end, the University establishes the right of each faculty member to determine if and how personal electronic devices are allowed to be used in the classroom. For complete information, please reference: <http://policy.umn.edu/education/studentresp>.

Grading and Transcripts

The University has two distinct grading scales: A–F and S–N.

A–F grading scale. The A–F grading scale allows the following grades and corresponding GPA points:

Grade	GPA Points	Definitions for undergraduate credit
A	4.000	Represents achievement that significantly exceeds expectations in the course.
A–	3.667	
B+	3.333	
B	3.000	Represents achievement that is above the minimum expectations in the course.
B–	2.667	
C+	2.333	
C	2.000	Represents achievement that meets the minimum expectations in the course.
C–	1.667	
D+	1.333	
D	1.000	Represents achievement that partially meets the minimum expectations in the course. Credit is earned but it may not fulfill major or program requirements.
F	0.000	Represents failure in the course and no credit is earned.

S–N grading scale. The S–N grading scale allows for the following grades and corresponding GPA points:

Grade	GPA Points	Definitions for undergraduate credit
S	0.000	Satisfactory (equivalent to a C– or better)
N	0.000	Not Satisfactory

For additional information, please refer to: <https://policy.umn.edu/education/gradingtranscripts>.
